BestPrimer EP602

Water-based epoxy primer, two components

BestPrimer EP602 is a water-based epoxy primer. It is a two pack low viscosity epoxy. **Description:**

BestPrimer EP602 has been specially formulated to improve penetrating and adhesive ability to the substrate for all kind of BestCoat.

BestPrimer EP602 is recommended as a priming coat before applying BestCoat system for wall, floor, ceiling of pharmaceutical and other clean Recommended for: areas, substrate against mild acids, alkalis, mineral oils, chemicals, parkdecks, industrial projects, warehouses... It can be applied on a wide variety of substrates such as concrete, masonry, mortar, etc.

> Deep penetrating, good bonding to substrates including metal. Allows surface to breathe preventing build up of vapor pressure.

Can apply to humid surface (humidity of the substrate ≤ 8%).

Mild acid, alkali, chemical, mineral oil...resistances.

 Easy to apply by brush, roller, sprayer... Long pot life to save cost.

No offensive odor, non toxic and environment friendly.

Product Data:

Advantage:

Package: 5; 25 kg/set.

Transparent liquid.

12 months from date of manufacture if stored in original unopened packing, Shelf life: in a dry enclosed place.

Supply form: Viscosity liquid.

Part A: Color: Part B: Light yellow liquid. Part A+B: Light yellow liquid.

Part A: $1.10 \pm 0.02 \text{ kg/lit } (25^{\circ}\text{C})$ Density: Part B: 1.02 ± 0.02 kg/lit (25°C)

Part A+B: 1.03 ± 0.02 kg/lit (25°C)

Solid content: ≥ 40 % (by weight)

Volatile Organic ≤ 60 % (by weight) Compounds:

 $0.10 \div 0.25 \text{ kg/m}^2/\text{layer}$ (Depending on surface condition) Consumption:

Application Minimum: +20°C (Above dew point at least 5°C)

temperature: Maximum: +35°C (Maximum permissible relative humidity: 80%)

Mechanical and Penetrating and bonding improve.

chemical properities: Mild acid, alkali, chemical and mineral oil resistances.

Mixing ratio: Part A: Part B = 1:4 (By weight)

CENTRAL BRANCH: 478B1 Dien Bien Phu Street, Thanh Khe District, Da Nang City Tel: (023) 6371 5299 - 6371 5399 Email: bm4@bestmix.com.vn

NORTHERN BRANCH: TT6.2 - 65, Dai Kim Urban Area, Hoang Mai Distrist, Ha Noi City Tel: (024) 3200 8234 Email: bm5@bestmix.com.vn

Pot life:

Ambient temperature	+20°C	+25°C	+30°C	+35°C
Pot life	150 Min.	100 Min.	60 Min.	40 Min.

Interval time:

Ambient temperature	+20°C	+25°C	+30°C	+35°C
Interval time between two layer: Minimum	24 Hrs	20 Hrs	16 Hrs	12 Hrs
Maximum	Unlimited	Unlimited	Unlimited	Unlimited

Application:

For strong absorption and soft surfaces: dilute BestPrimer EP702 with 10% clean water to apply first layer. Apply at least 02 primer layers before coating BestCoat

Substrate requirement:

lines. For flat surface, solid and average roughness: Apply 01 primer layer.

For polished hardener surfaces: should be treated with BestCorros before

application of BestPrimer EP602.

Substrate preparation: Concrete floor shall be cure for minimum 28 days, compressive strength: ≥ 20

MPa, tensile strength: \geq 1.5 MPa.

The substrate surface must be flat, solid, free from water, impurities, debris and

dirt must be properly cleaned.

Mixing:

Start the mixer, slowly add component A to component B (according to the mixing ratio) while the paddle is rotating at 300 ÷ 400 rpm. Minimum mixing time is 03 minutes but can mix longer until the required homogeneity is achieved. Leave material for about 5 minutes and mix again before application.

After mixing, apply by roller, sprayer or brush one full coat of BestPrimer EP602 at a spreading rate of approximately 0.10 ÷ 0.25 kg/m²/layer (depending on surface condition). Waiting for each coat dry before applying the further layer.

Application:

Note: Do not apply more than 0.40 kg/m²/layer in any case.

Placed area mush be good ventilation during film forming time, avoid sunlight

whenever materials hasn't cured.

Do no use the materials which is out of pot-life.

Cleaning:

Clean tools, equipments with clean water and detergent before product hardening.

Safety:

BestPrimer EP602 is a non toxic material. However, should wear gloves, masks

and glasses while handling the product.

In case of accidental eye contact, wash with fresh water and seek medical advice

immediately.
